### Fitting Instructions

**Position the battery with the bag handle to the top and the T-bar fitting towards you.**

Please note, the T-Bar fitting has an offset lug which matches that of the battery head and will only fit into the battery cap one way. The positive and negative are marked on the plug, positive goes to the right. Never force the plug into position.

The charging socket is on the right-hand side of the battery beneath the Velcro flap. When you plug the charger into the mains, it will show a green light. When plugged into the battery it will turn red. Once charging has been completed, the light will show green.

## Lithium LiFePO4 – Battery and Charger Guide

Thank you for your recent purchase from PowaTech, we really appreciate it.

Your NEW lithium battery is guaranteed against faulty materials or workmanship for 3 years from date of purchase. Please keep your receipt safe, in the unlikely event that you need to return the battery or charger under guarantee you will need it. These instructions will give you tips on how to care for your lithium battery.

**NOTE** – Only use the Lithium battery charger supplied with this battery, failure to do so will cause damage to the battery and invalidate your warranty.

Depending on the battery type purchased, your charger will either have a round RCA connector that plugs into the left

hand side of the battery or for black and red connections use the adaptor supplied to plug into the central jaws.

Connect the battery to the charger and then connect to your mains outlet. During the charge of your battery a RED light will show on the charger. When the battery is fully charged a GREEN light will show on the charger, at this point we recommend disconnecting the battery from the charger to preserve the life of the charger. Once charged the battery will remain ready for use for at least 12 weeks without further top up charging.

- Please make sure that your battery is charged straight away after use even if you have only played 9 holes.
- Do not open the battery or charger, this will invalidate your warranty.
- Do Not leave the charger plugged into the battery when plugged into the socket with the mains switch off as this may allow discharge of the battery.
- Your battery must not be submerged in liquid, this will invalidate the warranty.
- Dispose of at a recycling centre, do not put in landfill waste.

# Guarantee

Your PowaTech battery is guaranteed for 3 years against faulty workmanship or materials.

- Your battery must only be charged with the charger supplied with the battery set.
- The battery must not be dropped or submerged.
- The battery should not show any sign of physical damage.

If your battery fails, do check that you have charged correctly and fully, also check that your machine is not the issue.

Any issues should, in the first instance, be reported to your retailer with a copy of your receipt.
